Capabilities Statement

Our clients often need to assess, develop, re-imagine, and deploy data, systems, knowledge, people, and processes to disparate, remote workforces. Their teams are multifunctional with varying levels and are working in a highly regulated environment using standardized frameworks such as Cybersecurity (NIST, FISMA), Procurement Regulations (FAR, Agency Supplements), and Project Management (PMP), Agile Development (SAFe). FWDthink provides support in these areas in various ways, including assessments, audits, integration with products, implementation of services, staff augmentation, and training.

Our Culture

FWDthink has created a consultancy not confined by traditional think; a company that encourages and empowers its employees and clients to go beyond "the way it has always been done" – one that moves the world's ideas **FWD**. We love to solve complex problems and have fun doing it!

Core Competencies

FWDthink has worked with federal, state, and local governments, large commercial companies, and non-profit entities to deliver subject matter experts, training and coaching, and support staff to accomplish a specific mission. A few of our recent accomplishments are listed below:

- Provided RPA/AI support and consulting to Commercial clients.
- Provided Cybersecurity Compliance and ISSO support to DOS
- Provided IT Assessments, including site visits, strategic roadmaps and technology architecture designs to DOD clients.
- Support Air Force District Washington including all military and civilian workforces (20,000+ users) by providing all aspects of SharePoint and SQL support to include Operations and Maintenance, Business Solutions, Cloud Migration Strategy, Information Security and Disaster Recovery.
- Provided support staff including technical subject matter experts, technical writers, editors, and documentations specialists to an Army program.
- Provided expert advisors for procurement innovation projects.
- Trained & Coached 300+ on the Agile Framework using computer based and classroom formats for one client.
